## PROFILE

I am currently earning my BFA in Communication Design from Metropolitan State University of Denver. I naturally pick up and excel at most tasks and activities I encounter. That being said, I don't back down from tasks that do not come naturally. I find that when I push myself to learn new things, I thrive as a person and as a designer. For me, solving problems is a design task and a life task. The wheels of my mind are constantly turning, even when I'm not meaning to. It seems I am always building, creating, documenting, or planning something. I pride myself on having a diverse range of design skills which will help me to fit in to whatever style of workplace I find myself at.
